COURSE 1 TEXTBOOK: This book contains the first nine chapters of the Book and is used for Course 1 (see <http://richardnesmith.obior.cc>). IF you are seeking the full 20-chapter book, look for SECOND EDITION> A research-based book addressing brain-based learning and how secondary age students best learn and how teachers can best teach to meet those needs. American public education is on life support like never before. Why? The shift from LEARNING to standardized testing, ticking boxes for administrators, and watering down curricula are some of the

reasons. This synthesis of brain-based research emphasizes how students best learn. It is NOT a checklist, it is a strategy that empowered teachers can utilize to improve student learning. But, knowing how teens think enables teachers to know HOW TEENS best LEARN. --Dr. Richard NeSmith What Educators and Parents are Saying! Eric Demoncheaux, FRSC, Teaching Professional I Discoverer of the 'Nitrite Effect' I Founder & Editor Science Teachers Network. ence Teacher Network I am posting this note to thank Dr. Richard NeSmith for helping me know more about what goes through teenagers' minds and grow into a better teacher. Dr. NeSmith's 28-plus years teaching experience and careful study of biology, developmental and cognitive

psychology make him one of the best experts in the field. His book explains the difficulties students have learning at school and reflects on how to overcome them, promoting a better understanding of the changes going on in teenagers' lives as well as an elementary understanding of what causes pain points in the brain of the adult-in-the-making. Above all, Dr. NeSmith reminds us that teenagers are individuals, with their personality, strengths, weaknesses and their ways of showing love and concern. The book has been carefully researched and will make you aware of the cognitive-emotional interactions going on inside the mind of preadolescents to improve your teaching strategies. It is such a privilege to teach and take teenagers from childhood to

adulthood. Whether you are a parent, a teacher, or a school administrator you will find in this book strategies to facilitate learning and encourage lifelong learning. #teaching #cognitivescience #neuropsychology Everyone that teaches teens in some way needs this book! From teachers to school leaders and parents, Teaching Teenagers gives an intriguing look into the why behind what teens do. I wish I had this book many years ago at the start of my teaching career! Dr. NeSmith makes hard-hitting, research-supported, statements on curriculum, community, teaching and learning that expose what so many of us know needs to be changed in schools and, even offers a call to action. He has curated what we know about teens to equip us to

advocate in our communities that there is a better way to "do school." This book is an exciting manifesto for anyone that wants to see a needed revolution in education. --Dr. Toni Hull, Middle School Principal, Department of Education Teaching Fellow, Las Cruces, New Mexico (27-year veteran teacher/principal) "As a parent and educator, Dr. NeSmith has a wealth of knowledge and research to share with us all. In this book, What We Know, he has provided a detailed guide for administrators, teachers, and parents who strive to learn more about the adolescent experience in education. This book would be beneficial in a preparation program for teachers and administrators." --Dr. Ellie Baldwin, former Chair of Teacher Education, Regis University, Denver, CO "I think that this

book should be read by parents and teachers. This reading has enlightened me to a new observation of students and their ways of learning. Thank you for sharing this with me as I will cherish it and refer back to it regularly to help me in the future!" --Tara LaRocca, Biology Teacher, Plaquemine High School, Plaquemine, Louisiana (6th-year as a teacher). "I think this should be required reading for every parent, teacher, and administrator. I love that it addresses so many of the problems within our schools today and also offers practical, common-sense solutions." --Dana Fideline, Inola Public Schools, Inola, Oklahoma (12th year as teacher) "After teaching 19 years in a middle school setting, one would think there is not a lot to learn about how adolescents learn, but I was

wrong. Dr. NeSmith's book, What We Know about Teaching Teenagers! A Guide for Parents, Teachers, and Administrators, not only provided copious amounts of current scientific research about how students learn, what affects their learning potential, but also how adults in their life can help them become the person they want to become. Often when the parent of a struggling student is contacted, many parents are at a loss of what to do to help their child and seek advice from the school. I appreciate the many suggestions teachers or administrators can give to those parents to help positively impact the developing teenage brain." --Julie Allender, Teacher of 7th & 8th grade Integrated Science, DeAnza Middle School, Ontario, CA

"When I think of middle schoolers I think of them as quirky and that's why I love them. When I attempt to provide words of conciliation to mothers of teens the best advice I can give it that they are works in progress. Richard captures these sentiments in a well-researched study of the teen and his/her quirks and habits and elaborates on strategies to improve the educational climate for ALL in a structured solution to teachers, parents AND administrators." --Mary Howard, Sixth Grade Teacher. Master Teacher and New York State Teacher of the year finalist. Grand Island Central School District, Grand Island, New York
Parent-teacher's Manual for Welcome-vitā Portage & Main Press
 When a young girl helps tend to her grandmother's garden, she begins to

notice things that make her curious. Why does her grandmother have long, braided hair and beautifully coloured clothing? Why does she speak another language and spend so much time with her family? As she asks her grandmother about these things, she is told about life in a residential school a long time ago, where all of these things were taken away. *When We Were Alone* is a story about a difficult time in history, and, ultimately, one of empowerment and strength. Also available in a bilingual Swampy Cree/English edition. *When We Were Alone* won the 2017 Governor General's Literary Award in the Young People's Literature (Illustrated Books) category, and was nominated for the TD Canadian's Children's Literature Award.

Principles of Mathematics Book 1

Teacher Guide Corwin Press

Teacher Guide for Book 1 of the Principles of Mathematics - Biblical Worldview Curriculum for junior high! Math is a real-life tool that points us to God and helps us explore His creation, yet it often comes across as dry facts and meaningless rules. Here at last is a curriculum that has a biblical worldview integrated throughout the text and problems, not just added as an afterthought. The resources in the Teacher Guide will help students master and apply the skills learned in the Student Textbook. What does this Teacher Guide include? Worksheets,

Quizzes, and Tests: These perforated, three-hole punched pages help provide practice on the principles taught in the main student textbook. Answer Keys: The answers are included for the worksheets, quizzes, and tests found in this Teacher Guide. Schedule: A suggested calendar schedule is provided for completing the material in one year, though this can be adapted to meet individual student needs. There is also an accelerated schedule for completing the material in one semester. Are there any prerequisites for this course? This curriculum is aimed at grades 6-8, fitting into most math approaches the year or two years prior to starting high school algebra. If following traditional grade levels, Book 1 should be completed in grade 6 or 7, and Book 2 in grade 7 or 8.

In Book 1 students should have a basic knowledge of arithmetic (basic arithmetic will be reviewed, but at a fast pace and while teaching problem-solving skills and a biblical worldview of math) and sufficient mental development to think through the concepts and examples given. Typically, anyone in sixth grade or higher should be prepared to begin. The focus of the course is actually learning math for life, not simply preparing to pass a test.

Parent and Teacher Manual Mott Media (MI)

Book 5 is a guide for parents and teachers, which provides an overview of the topics covered in books 1-4. This title includes background information, troubleshooting and extra activities to support children (and grown-ups!) in

learning key coding concepts. The How to Code series introduces coding through clear and concise information, teamed with simple and practical tasks, from drawing shapes, giving instructions in code, building games and much more! With coding having been recently introduced into the UK curriculum as a result of the 'skills gap' within the industry, there's never been a better time to learn about programming. There are five titles in the How to Code series: Book 1: 978-1-78493-236-7 Book 2: 978-1-78493-237-4 Book 3: 978-1-78493-238-1 Book 4: 978-1-78493-239-8 Parents and Teacher Guide: 978-1-78493-240-4
