It is a simple method for prediction through which, even a person with a basic knowledge of astrology can give predictions based on the birth chart. The method utilizes the degrees of the planets in the birth chart. The planets in the highest degree and lowest degree are taken into account. Even planets which are 6/8 positions away from each other, will be combined when their degrees are close. Through this method we can predict whose relationship will be beneficial for him/her. We can also predict the planets which will support him though out his/her life, the gods whom should be worship and so on. Predictions together with the planets in the transit and the birth chart are also easily given.

By the term "Star" is meant that which is fixed and unchangeable and also motionless. There are myriads and myriads of these stars or jyotisa in the heavens. Out of these, there are only about 300 stars which are useful to the different globes or in other words have influence on them. All these countable stars are grouped into 27 group stars from Aswini to Revati. The three stars which resemble the face of a horse are called Aswini (Aswa-horse) and the three others in the form of a triangle are called Bharani, and similarly other groups, viz, Kritika, Rohini etc. First of all the Aswini group starts and to the east of this is Bharani and to the east of this Kritika and so on. And in this manner all the 27 stars-groups are formed into a circle commencing from the east. This is called the Bha-Chakra or Zodiac. All these stars have occupied Akasa or heavens. also learn about use of Stellar or nakshtras for accurate prediction.

The Ancient Indian astrological system of prediction, namely the Naadi system, is unique in its accuracy in predicting the events in one's life. However, the rules are rather complex and have been closely guarded secrets, through the ages. There are several Naadi systems and each one has its own method, with slight variations. This book deals with its own Naadi method with an assurance for better accuracy in predictions. It presents complex rules of Planetary Progression, Retrogression and Exchange with examples and makes it less ambiguous. The methods of working out planetary positions at any period of time in an individual's life for accurate predictions are clearly explained in the book. The rules presented in this book are different from one the author had talked about in his earlier book. It uses them to logically address the procedures for accurate predictions. This is an ideal text-book for beginners of astrology.

A unique system of analysis based on zonal effect of rasis and planets posited therein and influenced by other planets from specified places is the main principle of Bhrigu Nandi Nadi expounded by R.G.Rao of Bangalore. Based on his works earlier book "Prediction Secrets- Naadi Astrology" was published. In the process of experimentation with the combination of the planets it was found that every birth has a set-pattern of planetary positions. The matrix formed at macro level indicates the purpose of the birth. At micro level with zonal and star influences detailed study of nativity will reveal many secrets. The star level needs to be explored with details of stars from the sacred texts. But the place of birth having different Year Lords, Month Lord the Day Lord, Hora Lord and Sub Hora Lord have equal influence in differentiating nativities. In this book an effort is made to identify the matrix at macro level for certain births. A deep analysis with the aid of Hora Lords etc. will definitely give the purpose of birth. Even with little efforts we can go to previous births. The horoscope of yogis are dealt with reference to Sub Hora Lords. There is also an example of analysing horoscopes having similar planetary combinations. This is a beginning of research in Naadi Astrology and the days are not far to reach the truth behind the Celestial Matrix influenced by subtle bodies. This is a handbook on Naadi System for the students and astrologers to develop further in the subject.

It has been a well-known fact that astrology was called the eye of the Vedas, for it threw light on matters relating to timing events. The conduct of Vedic rituals had to be timed at a specific period, hence astrology was put to this use. In the modern context, this divine science is used to interpret birth charts to have an overview of an individual's personal and professional future in terms of success and prosperity. The book deals with this analysis at great length and enlightens a lay reader about the subject.

Astrology is the scientific study and application of language of the heavenly bodies. These heavenly bodies determined on the basis of Astronomy and mathematics, are mapped in the form of a horoscope. Their specific locations in the horoscope indicate specific happenings in the case of individuals, of multitudes and of geographical regions. Whether the Sun, the Moon, the planets and stars themselves influence the terrestrial phenomena, or they only indicate such phenomena by their various dispositions, is immaterial. What is important to us is that variations in their disposition determine variations in the events on the earth; the correlations are only too strong to be brushed aside by critics of Astrology. Astrology consists of several systems of divination based on the premise that there is a relationship between astronomical phenomena and events in the human world. Many cultures have attached importance to astronomical events, and the Indians, Chinese, and Mayans developed elaborate systems for predicting terrestrial events from celestial observations. In the West, astrology most often consists of a system of horoscopes purporting to explain aspects of a person's personality and predict future events in their life based on the positions of the sun, moon, and other celestial objects at the time of their birth. When the zodiac is divided into twelve equal parts, each such part has an extension of 30 degrees of the arc. Such a division is called a section. A section consists of two and a quarter nakshatras. Actually, the fixed stars position move by a few dozens of seconds of arc per year, 50.2 seconds to be more precise, which means one degree every 72 years, approximately. The Ancients had rapidly understood that the most important stars, those they could observe, had an influence when they were in tight

conjunction - less than 2 of orb, and even better, less than 30' of orb - with planets or angles of the natal chart. A particular group of stars in the zodiac is considered as the starting point of the zodiac. From this point, the twenty-seven nakshatras or the twelve sections begin. A planet located anywhere along the zodiac may be considered as located in a particular section, depending upon which twelfth division of the zodiac it is in; it may be considered as being located in a particular nakshatra too, depending upon which twenty seventh division of the zodiac it is in. The planets from the Sun to Saturn have been allotted the ownership of these sections. While the Sun and the Moon are the lords of one section each, the remaining planets own two sections each. Rahu and Ketu are generally not allotted ownership of these sections. There are 150 Nadi's in a sign, one sign is 30 degrees of zodiac. Twelve signs of zodiac grouped into three categories: Movable, Fixed and Dual signs Nomenclature of 150 Nadi's is peculiar to each of these three types of signs. Nadi control the functioning of Veins, Arteries, Nerves, Blood Cells and talks about a person's past, present and future and is mostly concerned with material things like getting a job, construction of house, marriage, curing a disease, etc."

Doctrines of Suka Nadi, Retold Shubh Bhagat

Among various Vargas, the relative importance of Navamsha is universally acclaimed. Astrologers consider it to be just next to birth chart or equal to birth chart or even better than the birth chart. Almost all astrologers use Navamsha and birth chart together to assess strengths of various houses and planets before giving any opinion. In Vedic astrology, Navamsha occupies an outstanding position and draws one's attention for deeper understanding/ scrutiny due to its multifarious technique and usage. The additional inputs in the form of scintillating concepts by Jaimini and Nadi system have made the subject more engrossing. The author has tried to incorporate the same in the book. The study of a birth chart gives only the gross (Sthool) indications of characteristics of various houses and planets; while Navamsha offers their detailed (Sookshmatar) values. It is so because a Navamsha is basically equal to both in its size and extent to a quarter/ one fourth / pada of a Nakshtra, thereby giving it a stellar role. While a house represents a combined spectrum of 30 degrees, a Navamsha provides a microscopic view of 3° 20' or 1/ 9 part of a sign only.
