What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these

and many other questions in this second edition of *Understanding by Design*. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on

the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools, and examples from all subject areas, the book demonstrates how the research-based principles of Understanding by Design apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of Understanding by Design offers teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

Activity Guide is a companion to the book *The Student EQ Edge: Emotional Intelligence and Your Academic and Personal Success*. It offers faculty and facilitators a hands-on resource for helping students reach their potential by tapping into the power of emotional intelligence. The Facilitation Guide includes exercises and activities which are designed to help students develop confidence, independence, the ability to set and meet goals, impulse control, social responsibility, problem-solving skills, stress tolerance, and much more—all of which help improve academic success. The Guide also contains a wealth of illustrative case studies, questions for student reflection, movie selections and TV shows that illustrate emotional intelligence, and a self-development plan. "The single best resource on emotional intelligence in student affairs, *The Student EQ Edge: Student Workbook and Facilitation and Activity Guide* are well organized, creative, and offer everything an emotional intelligence facilitator would need in a fast-

paced student affairs environment. The examples are soundly constructed and resonate with students. These materials are my go-to resources."—Candice Johnston, associate director of student leadership and organizations, Wake Forest University "If I were building a new course to improve student success, it would be founded on emotional intelligence. All the instruction in the world on 'study skills' cannot touch the advantages that come to students who are able to manage their emotional intelligence. And the best news of all is that these skills can be taught. EQ skills make the difference." —Randy L. Swing, executive director, Association for Institutional Research "This Facilitation and Activity Guide is particularly useful, offering options from which the facilitator can draw in preparing assignments or learning community meetings. The focus on learners' needs, and particularly an authentic exploration of self and purpose, is practical yet has the potential to draw students to a deeper understanding of self that will draw them to

highperformance and contribution to others."—Dennis Roberts, assistant vice president for faculty and student services for the Qatar Foundation

 School, Family, and Community Partnerships: Preparing Educators and Improving Schools, 3rd Edition prepares future teachers and administrators to conduct effective and equitable programs of family and community engagement that contribute to student success in school. Renowned authors Joyce L. Epstein and Steven B. Sheldon present the theories, research, policies, and practices that have been shown to improve the design and conduct of partnership programs in diverse communities and at all grade levels. Chapters include a historic overview of early research, recent studies with advanced methods, and many examples of research-based approaches for district leadership and school improvement. All chapters include discussion questions and classroom assignments that professors may use to provoke thinking and help future educators understand that family and community engagement is part of their professional work. New in this 3rd Edition: Updated, streamlined

readings make it easy for students to explore early, influential studies that framed the field and recent studies of multilevel effects of leadership for partnerships. Comments, discussion topics, and classroom activities challenge students to think deeply about many aspects and issues of school, family, and community partnerships. Interview assignments enable students to hear the voices and views on partnerships of practicing educators, parents, students, and others in the community. Readings and activities across chapters help colleges and universities meet new standards of the Council for the Accreditation of Educator Preparation (CAEP) for graduates to "demonstrate their ability to effectively work with diverse P-12 students and their families." After decades of research and exemplary practice that confirm that family and community engagement is an essential component of good school organization, most new teachers and administrators still are unprepared to partner with all families to support student learning and development. This book

will help professors in Schools, Colleges, and Departments of Education (SCDE) prepare their graduates to understand, organize, and continually improve partnership programs in all schools, with all families, and for all students.

The Performance Appraisal Tool Kit Taylor & Francis

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message

onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.
