At five and twenty, Prudence Merryweather knew very well tht risks a woman took by visiting a gentleman in the dead of night. But bearding the notorious Earl of Angelstone in his den was the only way to stop him from engaging her hot-headed brother in a duel. And that was why she found herself ushered into Sebastian's frobidding presence at three int the morning—and thoroughly kissed before dawn. She was a country-bred innocent—and an

intriguing experience for a man who dwelt more in the shadows than in the sunshine. And the reckless beauty would soon need all the protection she could get...

Fluierul & Dantela este un volum de povesti terapeutice inspirate din traditiile populare romanesti. Povestea IEI abordeaza teama de a se pierde, de a nu mai gasi drumul spre casa. Lipsa reperelor. Ia romanesc dincolo de estetismul ei e o carte magica intesata de simboluri. Fiecare motiv, fiecare cruciulita, reflecta o anumita viziune asupra lumii. Fiecare motiv, fiecare cruciulita, poarta zbuciumul firului de dinainte de culoare, gingasia degetelor stranse buchet in jurul acului, si cele o mie de ferestre catre satul natal si catre Dumnezeu. Calatorul inzebrat de ai sai cu o astfel de carte" nu se poate niciodata pierde pe drum. Povestea Dantelei, abordeaza o alta problema: aceea a asteparii.

Ce facem cu toate acele momente in care trebuie sa asteptam parintii, sau atunci cand adulti fiind traversam lungi ani de asteptare. Asteptarea unei schimbari, a unui miracol, asteptarea unui loc de munca mai bun. Ce facem atunci cand aparent nu putem face nimic, cand gandurile ne sunt suspendate si timpul pare sa ne fie furat? Povestea Fluierului, abordeaza problema loviturilor pe care viata ni le da. Ce facem cu creanga copacului care ne-a lovit? Cu unchiul Nutu si fluierul lui, coboram de la efecte spre cauze, tot mai adanc, pana la mugure... Si la muguri ajunsi constatam ceva teribil: in locul in care credeam ca in sfarsit vom pune mana pe vionvatul vinovatilor, marele monstru rau.... dam nas in nas cu Dumnezeu!

From the international bestselling author of *The Book of Fate* comes the story, based on real events, of a four-year-old boy who cannot speak and the shame it brings upon his family in modern-day Iran. Four-year-old Shahaab has not started talking. The family doctor believes there is no cause for concern; nevertheless, Shahaab is ridiculed by others who call him "dumb." Young Shahaab doesn't understand what the word means and thinks it is a compliment, until one day his cousin plays a trick on him to prove to everyone that the boy truly is the neighbourhood idiot. When his mother recounts the incident to her husband, Shahaab is crushed to learn that his father also thinks the boy's speech impediment indicates that his son is an idiot and thus brings shame on the family. He begins to lash out, taking childish revenge on those around him, encouraged by his two imaginary friends, Esi and Bibi. No one in the family can understand Shahaab's wild behaviour except his maternal grandmother, who seems to possess the understanding and the kindness he so desperately craves. Their growing bond leads to a deep friendship in which Shahaab is able to experience some happiness and finally find his voice.

First Published in 1999. Psychoanalysis first developed as a method of therapy in the strict medical sense. Freud had discovered that certain circumscribed disorders that have no discernible organic basis—such as hysterical convulsions, phobias, depressions, drug addictions, functional stomach upsets --can be cured by uncovering the unconscious factors that underlie them. In the course of time disturbances of this kind were summarily called neurotic. Therefore humility as well as hope is required in any discussion of the possibility of psychoanalytic self-examination. It is the object of this book to raise this question seriously, with all due consideration for the difficulties involved.

George Astalos has remained a contestatory visionary, a playwright and poet who offers critiques of Eastern bloc tyranny and Western moral bankruptcy. In *Social Memory and History*, a group of anthropologists, sociologists, social linguists, gerontologists, and historians explore the ways in which memory reconstructs the past and constructs the present. A substantial introduction by the editors outlines the key issues in the understanding of social memory: its nature and process, its personal and political implications, the

crisis in memory, and the relationship between social and individual memory. Ten cross-cultural case studies—groups ranging from Kiowa songsters, Burgundian farmers, elderly Philadelphia whites, Chilean political activists, American immigrants to Israel, and Irish working class women—then explore how social memory transmits culture or contests it at the individual, community, and national levels in both tangible and symbolic spheres.

John Galsworthy OM (1867-1933) was an English novelist and playwright. He is viewed as one of the first writers of the Edwardian era; challenging in his works some of the ideals of society depicted in the preceding literature of Victorian England. He won the Nobel Prize for literature in 1932. Notable works include *The Forsyte Saga* (1906-1921) and its sequels, *A Modern Comedy* and *End of the Chapter*. From the *Four Winds* was Galsworthy's first published work in 1897, a collection of short stories. These, and several subsequent works, were published under the pen name John Sinjohn and it would not be until *The Island Pharisees* (1904) that he would begin publishing under his own name. His first play, *The Silver Box* (1906) became a success, and he followed it up with *The Man of Property* (1906), the first in the Forsyte trilogy. Along with other writers of the time such as Shaw his plays addressed the class system and social issues, two of the best known being *Strife* (1909) and *The Skin Game* (1920).

Solar Resources

Solar Resources takes stock of the resource - sunlight - on which any plan for solar heat conversion technologies must be based. It

describes the evolution of theoretical models, algorithms, and equipment for measuring, analyzing, and predicting the quantity and composition of solar radiation, and it reviews and directs readers to insolation databases and other references that have been compiled since 1975. Following an overview of solar energy research by the editor, Raymond J. Bahm presents a comprehensive guide to available insolation databases and other information resources in the United States. Charles M. Randall and Richard Bird discuss the theoretical models and algorithms used to characterize the transference of solar radiation through the earth's atmosphere. Their chapter also addresses the important question of the accuracy of the data sets produced by the various modeling methods and algorithms. The National Weather Service (NWS) monitoring network and other major monitoring networks in the United States are discussed by Kirby Hanson and Thomas Stoffel. And Eugene Zerlaut covers the

instrumentation used to measure total solar irradiance and spectral solar irradiance; he describes types of equipment, their manufacturers, procedures for calibration, and the accuracy of the data produced. Richard Bird and Carol Riordan explain the nature of spectral solar irradiance at the earth's surface, and John Jensenius describes the NWS Operational Solar Insolation Forecast System, which predicts the daily total global-horizontal insolation for two days. In the concluding chapter, Claude Robbins summarizes daylighting models and resources, and details methods for converting insolation data to illuminance data. Solar Resources is volume 2 in the series Solar Heat Technologies: Fundamentals and Applications, edited by Charles A. Bankston
